Kontour

Designed by Wolfgang C.R. Mezger

Kontour modular seating, with coordinating ottomans and tables, can be arranged in limitless configurations to provide comfortable, functional seating options. Its rectilinear and curvilinear shapes create strong visual interest while increasing a designer's ability to define spaces and control traffic flow in large public areas.

Wolfgang Mezger's modern interpretation of a Tete-a-Tete defines space and enhances idea sharing. The quilted stitch detail on the seat breaks up the visual plane and adds an essential graphic element to the design.

Kontour lounge offers multiple back and arm options including a stylish two-thirds back. An array of end tables and connecting tables complete the modular collection. The beautiful design of the Kontour leg is both graceful and elegant.

Upholstered enclosures are available on specific seating elements. These screens fashion a room within a room creating visual and acoustical privacy even when seated within vast, open spaces. Kontour's powered tables support technology and the way people work today.

Shown with Soft by Davis

Kontour ottomans, offered in round, square, and organic shapes add to the functionality of the line. Ottomans integrate seamlessly with Kontour seating yet have the presence to independently create beautiful and functional work environments.
