

NEVERS

Americana™ Contemporary

Americana™ Contemporary

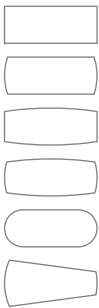

This flagship collection is the hallmark of American ingenuity with straightforward quality, innovative, smart and lasting design. Americana Contemporary is the comprehensive solution for meeting, conferencing and training.

This timeless collection includes tables, media walls, credenzas, lecterns and visual products to support executive collaboration.

Under the cool, clean contemporary exterior lies plenty of technological muscle.

Nevers' proprietary Meeting Link™ technology provides electrical, data and AV connectivity built right into the table to provide solutions for high performance meeting and training rooms.

Presentation | Boardroom

No one does tables like Nevers.

Boardroom environments reflect an organization's identity and strength as vividly as their logo and corporate message.

Our presentation tables match your aesthetic as well as provide functional support for communication and inspiration through sightlines, integrated power and data, and options tailored to your office design.

Our tables are offered in standard sizes and shapes as shown below.

Custom applications, like the grand table on the left, offer features such as our revolutionary wall base for maximum stability, wire management, and leg room.

Whether a start-up enterprise or a Fortune 500, you're in good company with Nevers.

Change the Base — Change the Table

Americana Contemporary conference tables are standard in lengths from 8' to 30' in three widths and multiple shapes, finishes and edge profiles.

The bases are just as agile and powerful — available in panels, drums, half drums and combinations.

All our bases are offered in wood veneer and color coat finishes, with plinth or metal inlay options.

Intelligent Tables

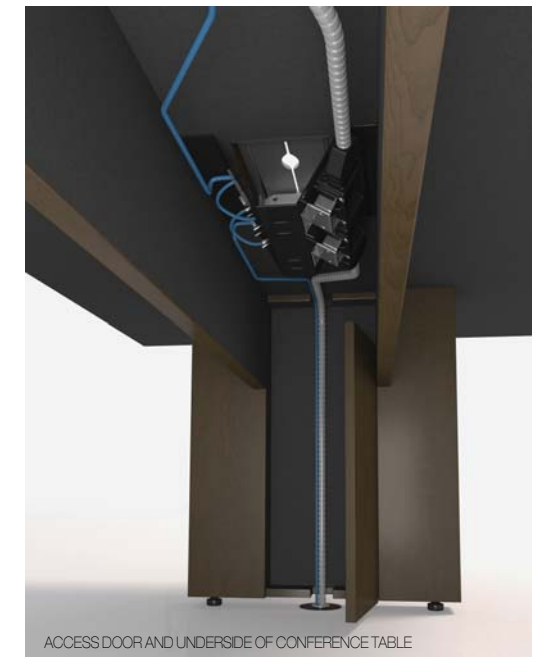

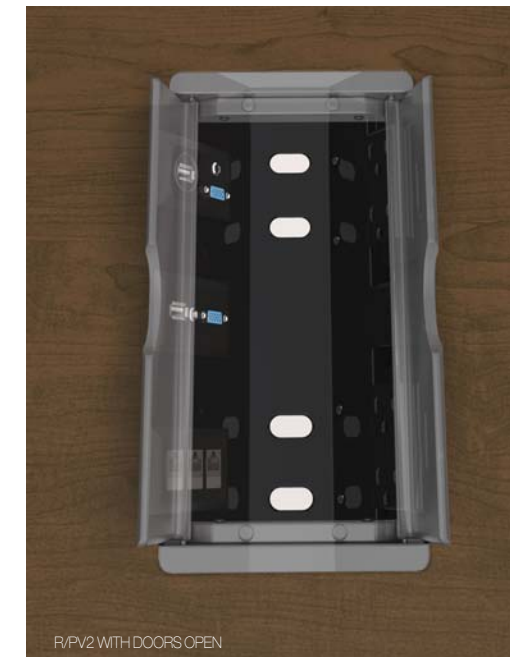

The top goes on last for a reason — it makes power, voice, data and AV integration a breeze.

You decide how much data support you need, how specific the IT and AV integration needs to be, and we build it right into your table.

The image below illustrates how intuitively our bases facilitate wiring from the floor, through the base and beam set to the underside of the table itself.

Our Meeting Link™ Power/Voice/Data Technology Centers are available in Light, Medium and Heavy Duty capacities.

Unsure about what you need? Just have your IT/AV consultant contact our Customer Service to develop your perfect technology solution to fit your exact needs.

Mobile Multi-Tasking Tables

Nevers folding/nesting mobile tables may be the hardest working tables in America. They flip, glide and roll, and can be reconfigured in moments making managing and storing them a breeze.

They can be a classroom at 9AM, a conference room at Noon and an open forum all afternoon, simply by moving the tables into rows or any other formation.

Choose from an array of base styles and table shapes to get just the right configuration and look you need.

We offer panel bases, T-Legs and C-Legs with levelers, glides, or casters, with or without modesty panels and with or without power, data or AV support.

Complete your room with an Americana Contemporary lectern, visual board and credenza to be ready for any task.

Handsome Storage and Hospitality

Americana Contemporary credenzas are as versatile as they are functional. We offer five standard widths in two depths and two heights with three base options and matching edge profiles to our tables.

We are pleased to offer an expanded collection of standard hardware options and features.

Monitor lifts, pull-out trash and recycling bins and e-Version vented backs specifically designed for electronic equipment will meet your every need.

Our hospitality credenzas feature pull-out serving shelves, drawers and doors and optional refrigeration.

The Power of Live Communication

How many people would you like to motivate from the speaker's lectern? How many great new ideas have been captured in a brainstorming session on a white board? And, how much could you accomplish today with everyone in the same room?

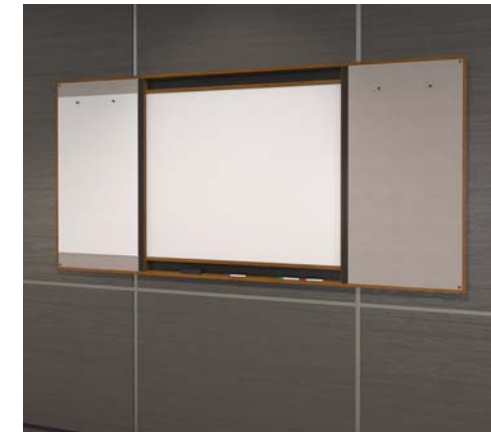

Nevers can make all that happen with our lecterns, visual products and media walls.

Just like our tables and credenzas, Nevers' lecterns offer a wide variety of design choices with table-matching edge details to create a seamless continuity in your meeting room.

Our electronic lectern manages technology flawlessly while maintaining the classic elegance of Americana Contemporary style.
