## Ad-Lib Litework

With the development of the Ad-Lib family we set out to redefine the genre of multi-purpose seating as we recognize changing needs.

The LiteWork version is the ideal solution for ad hoc touch down working environments, as well as team based project meeting environments.

The inclusion of the dynamic yoke incorporates a free floating tilt action and seat height adjustment which enhances the ergonomic performance of this chair.

Design by PearsonLloyd

### Standard Features (\*Selected models only)

- Plastic seat and back frame
- Plastic contoured seat and back panels\*
- Plastic contoured back panel and upholstered seat\*
- Fully upholstered seat and back\*
- Black gas lift
- Dynamic tilt seat yoke with height adjustable gas lift and floating seat action

- Injection molded 5-Star base
- 2.5" twin hard wheel casters
- Back frame with integral arms covered in soft touch plastic\*

- Aluminum fixed (non tilt) seat yoke, matching chair frame
- Two-tone upholstery\*

### Performance Standards

- ANSI/BIFMA X5.1:2011
- SCS-EC10.3-2014 Indoor Air Quality

## DIMENSIONS

## DESIGN

### PearsonLloyd

The London based practice takes a collaborative approach to its work, embracing the restrictions imposed by production, the market and all the other factors that define a brief. Their work is grounded in research and at the core is an attempt to

understand the relationship between a product, its place, and the way people use it. It is this innovative thinking that earned PearsonLloyd a Red Dot Award for the design of Ad-Lib for Senator.

### SENATOR 3 R'S

Senator is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R's principle

-Reduce, Reuse and Recycle.

Whilst recycling is the element which receives the most exposure it is actually the last option available and should never be the prime target in anyone's battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to **Reduce** usage. Then we should look to **Reuse** wherever possible and finally, only after these two processes have been exhausted, should we consider **Recycling**.

# -Reduce -Reuse -Recycle
