# fractals

Designed by Jeffrey Bennett and Nicholas Dodziuk for Studio TK, the Fractals™ seating group was conceived to support workers in open and collaborative environments and to provide a modular program that creates a new level of planning.

Fractals includes three simple pieces: a lounge chair, an ottoman/bench and a settee with a lower or optional higher back for a degree of privacy. The surface planes, volumes and modularity of the pieces are intended to create a broad canvas on which to use a variety of colors and textures to create distinctive looks. Boldly innovative and visually compelling, Fractals opens up new possibilities for forward-thinking environments.
